Scope of Work:

- HackerYou, the world's premier coding school with only the most brilliant students is looking for a quick, easy way to generate landing pages for bootcamp students to temporarily display while creating their portfolio of work.

Requirements

- User should be able to enter their name and a subtitle
- User should be able to input links for Github, Linkedin, and Twitter
- Upload a custom background image or choose a custom background colour
- Load a google font of their choice (or curated from a list of options)
- There should also be the option to choose a pre-built "theme" that pairs colour themes with fonts for them (this information should be stored in a firebase database)
- The user should be able to see a preview of their landing page
- Once finished, you should be able to 'copy' or 'save' html and css code that they can use to create the website

Deadline:

- Wireframes by Wednesday
- Beta by Friday
- Final by the following Wednesday

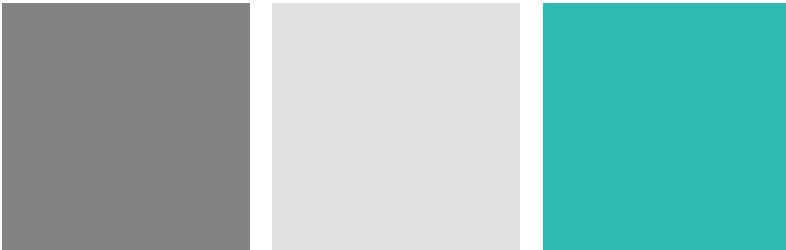

Deliverables:

- Project up on GitHub
- Project live at URL (can be gh-pages URL)
