█ Client Brief

Karaoke Set List

Scope of Work:

- We have discovered there is a market for type-A Karaoke singers! We need an app that people can collect their own set list of performable Karaoke songs and include the lyrics to them. This will enable a whole new set of people to participate in the fun of Karaoke because their well preparedness will help them combat their nerves and give them a repeatable, performable set of karaoke classics.

Requirements

- They should be able to search for songs using the Spotify API and listen to songs they might like to sing
- While they are listening to the songs - they are also able to view the lyrics
- They can save names and artists of the songs they want to sing to a set list in Firebase
- They can also view the lyrics of the song in the set list so they can refresh their memory just before they go up!
- API: https://developer.spotify.com/web-api/   https://github.com/rhnvrm/lyric-api

Extras

- Allow users to sign into a profile so that their setlists are separate from other users.

Deadline:

- Wireframes by Wednesday
- Beta by Friday
- Final by the following Wednesday

Deliverables:

- Project up on GitHub
- Project live at URL (can be gh-pages URL)
